

COIN7 ECOSYSTEM

WHITEPAPER

Building a bridge
between virtuality
and reality

EXECUTIVE SUMMARY

Coin7 aims to revolutionize the trade of goods and services by building one of the world's first marketplaces based on cryptocurrencies.

The project provides a secure, fast, and cost-effective alternative to traditional payment methods. With its MLM and advertising cashback module, users can generate extra income and actively shape the platform. The mining module allows users to mine coins directly from their mobile device, contributing to their availability in the market and earning coins. The advertising module offers app users a default 50% revenue share of all advertising income, and the MLM module allows users to create additional income streams and build a distribution structure.

All earnings are transferred to the wallet module in the form of coins, which will have a sealed paper wallet and payment gateway functions. Coin7 is developing its own blockchain technology with the goal of optimizing both speed and security, while lowering transaction fees, resulting in a more satisfying experience for the users. The blockchain will be incorporated into the wallet module, allowing users to conduct transactions quickly and without concern about fees or delays.

WHAT DO WE WANT TO ACHIEVE

According to a 2021 study by market research firm Statistics, around 221 million people worldwide use cryptocurrencies such as Bitcoin, Ethereum, and other digital currencies, which represent roughly 2.9% of the global population. However, there is still a significant amount of uncertainty and fear among the general public when it comes to using cryptocurrencies. This fear is exacerbated by manipulative media coverage and market movements on crypto exchanges. Another major obstacle is the time-consuming and complicated process of converting real money into crypto, storing it securely, and then converting it back to fiat currency for goods and services.

OUR GOAL

Our project's aim is to expand the usage of cryptocurrencies by encouraging more people to be involved. With our app's mining function, we are providing our users with a risk-free way to participate in the crypto world without making any financial investment. Our app is designed to start mining with just one click, and our MLM function enables even inexperienced users to recruit their family and friends to earn additional income and generate passive earnings. This approach creates a stronger connection between us and the Coin7 community, which helps to strengthen their trust.

NEW WORLD ORDER

Coin7 - A Revolutionary Ecosystem for Decentralized Finance

Introduction:

Coin7 is a world we aim to bring to life - a world where power shifts and everyone has equal opportunities. Our goal is to develop a revolutionary ecosystem, unlike anything you have ever seen. We will create a wide-ranging platform which is still user-friendly so that anyone can participate regardless of age or experience.

Coin7 Ecosystem:

In the Coin7 ecosystem, we will merge the virtual and real worlds together. We make it easy for everyone to convert cryptocurrencies into real money in the shortest possible time. Additionally, you can use your cryptocurrency directly on our marketplace to purchase goods and services. We strive to create an inclusive environment within our community, with the goal of engaging all segments of the population in this project. However, we will reverse the roles and create a dependency between the rich and the poor. In our ecosystem, crypto money will be produced by the people and converted by investors.

Coin7 Marketplace:

The marketplace will offer a vast range of goods and services that users can purchase using cryptocurrencies. We will partner with various businesses to provide our users with a wide range of products and services. We believe that our marketplace will change the way people conduct transactions, as it offers an exclusive and innovative solution for converting cryptocurrencies into real-world assets.

Coin7 Mining:

We have created a unique mining module that enables app users to mine our coins directly from their mobile devices. Users do not require any special hardware or technical knowledge to begin mining. Users cannot access our mining function from other platforms as we offer it exclusively through our app. During the initial phase, mining will be carried out in simulation mode. Real coins will be deposited in user wallets once our proprietary blockchain is ready. From that point on, we will continue mining on our own blockchain. The mining process must be restarted every 24 hours. This encourages users to access our app every day, leading to increased income from advertising and other modules.

Conclusion:

Our Coin7 ecosystem aims to revolutionize the world of decentralized finance. We believe that our unique approach to crypto mining and marketplace will create a new network that will benefit all users, despite their background or experience. We are confident that our project will attract investors and users alike, and we look forward to making our vision a reality.

The Coin7 app is multifunctional and multilingual. It is designed to be easily expandable without any issues. The structure of the system is modular, where each module works independently and communicates with one another through interfaces.

DESCRIPTION OF OUR MINING MODULE

Introduction:

Our mining module is a unique feature that enables our app users to mine our coins directly from their mobile devices. With no need for special hardware or technical knowledge, our user-friendly interface makes it easy to start mining with just one click, anytime and anywhere.

How it works:

The mining function is accessible solely through our app. Initially, mining will take place in simulation mode. Our users' wallets will be credited with the coins mined thus far once we finish testing our blockchain. After this point, we will continue mining exclusively on our blockchain. Users are required to restart the mining process every 24 hours, which incentivizes them to use our app daily and generates additional revenue through the advertising module.

Benefits:

Our mining module is designed to introduce inexperienced users to the world of cryptocurrency and allow them to enter without any risk or investment. By using our app, users directly contribute to the recognition of our application and our tokens, thereby contributing to our company's overall value. The mining module aims to create user engagement, build their trust, and provide them with a great opportunity to acquire our coins for free and actively participate in the appreciation of our project.

Conclusion:

Overall, there is no doubt that our mining module is one of the most effective and efficient ways to increase the engagement of users, build trust among them, as well as provide them with an excellent opportunity to earn free coins daily and actively participate in the appreciation of our project. With our easy-to-use interface, everyone can start mining within minutes, making it accessible to anyone who wants to get involved in mining.

DESCRIPTION OF OUR ADVERTISING MODULE

Introduction:

The advertising module offers our app users a default 50% revenue share of all advertising income generated through our app. By using this module, our users can passively participate in our company's revenue and benefit from it.

FUNCTIONALITY:

Our app seamlessly integrates with our advertising module, allowing users to earn a share of the revenue when they view or click on an ad. The user can access the advertising revenue section at any time to check on their earnings status. Distribution is automated and takes place on a weekly basis. Our app is user-friendly and offers many personalized options. For example, the user can choose to accept additional popup ads to generate more revenue or disable them if they prefer. We offer our users the flexibility to adjust and optimize their advertising experience within the app.

REVENUE:

Using the advertising module is an ideal way for our users to passively participate in our company's revenue. We expect this to lead to higher user engagement with our app. As our user base grows and advertising revenue increases, the overall revenue share for our users will grow too. We believe that this will also contribute to accelerating the expansion of our app and our company.

SUMMARY:

Overall, our advertising module offers a convenient way for our users to passively participate in our company's revenue. With a default 50% revenue share of all advertising income, our module provides our users with an easy way to increase their earnings without any additional effort. As a result, this will contribute to the rapid growth of our app and the company as a whole.

DESCRIPTION OF OUR MLM MODULE

Accelerated growth through multi-level marketing with our MLM module

INCOME STREAMS:

By using the MLM module, app users can generate additional income streams by building their networks and recommending the app to friends and colleagues.

- **Expansion of distribution structure:** Users can build their own distribution structures with the MLM module, increasing the app's reach and growing its user base.
- **Activation:** Participants of the MLM module can activate up to 5 levels, depending on how many users they can successfully recruit. In our multi-level system, the more levels that are activated, the greater the potential for additional income streams.
- **Manager functions:** Networks can be built and managed effectively with the MLM module's manager functions. Users can control their networks more effectively using tools such as sales reports, analytics, and incentives.
- **User-Interface:** Our MLM module's user interface is simple and easy to use, allowing anyone to build and manage their own distribution network, regardless of their network marketing experience.
- **Integration:** Initially, the MLM module will be available for the mining and advertising modules, but it will also be available for future modules, leading to seamless integration and a better user experience.

SUMMARY:

Overall, our MLM module offers a range of benefits for users. These benefits include additional income streams, expansion of distribution structure, activation of up to 5 levels, manager functions, a simple user interface, and compatibility with other modules.

THE HEART OF OUR APPLICATION

COIN7 WALLET

Wallet module

To provide users with a convenient way to keep track of their cryptocurrency, we have created the wallet module as an essential feature of our project. Our wallet module offers several key features that make it stand out from other wallets on the market.

Overview:

The wallet module is an integral part of our app and is designed to be user-friendly and reliable. All earnings generated from our app are transferred directly to your wallet in the form of coins. The wallet module will also have a secure paper wallet function, allowing you to manage your coins offline without fear of your wallet being hacked.

Key Features:

Our wallet module offers several key features that make it unique and highly functional. These include:

Paper Wallet Functionality:

There is an offline paper wallet feature in the wallet module, so you can store your coins securely. By using this feature, you ensure that your coins are safe and not vulnerable to hacking.

Browser Extensions:

Our wallet module will have browser extensions that allow users to conveniently shop at external stores and make payments using their coins. This feature provides added comfort for users, making it easy to use coins for online purchases.

Payment Gateway Functionality:

The wallet module will also offer payment gateway functionality, allowing users to pay for goods and services using their coins. This feature makes it pleasant for users to use their coins in everyday transactions.

Optimization for Our Blockchain:

By fine-tuning the wallet module for our blockchain, transaction fees can be reduced, and the efficiency of transactions can be increased.

Conclusion:

We consider our wallet module to be an essential feature, designed to provide users with a dependable and fast way to manage their coins. The paper wallet function, browser extensions, payment gateway functionality, and improvements for our blockchain makes our wallet module unique and highly functional. With our wallet module, users can manage their coins, shop online, and pay for goods and services with ease.

DEVELOPING A SECURE AND EFFICIENT BLOCKCHAIN DATABASE FOR OUR WALLET MODULE

Introduction: Our company is committed to providing our users with the best possible experience when it comes to reliable transactions. In pursuit of this goal, our own blockchain technology will be integrated with our wallet module.

Blockchain Database: The blockchain technology will be optimized to achieve a fast processing time and reduced costs, unlike traditional blockchain networks, which may exhibit slow executions and have high transaction fees. By creating our own coin and a blockchain-based marketplace that connects with our wallet, we will be able to provide our users with a more enhanced experience that prioritizes safety and improves performance.

Benefits of Our Blockchain-Based Marketplace:

1. **High Speed Transactions:** Our blockchain network will provide rapid transaction speeds, enabling our users to carry out transactions quickly and with ease.
2. **Lower Transaction Fees:** By establishing our own blockchain, we will significantly reduce transaction fees, making the transactions a lot easier and more affordable for our users.
3. **Increased Security:** The blockchain will be built with the latest security features, ensuring our users' transactions are safe and protected at all times.
4. **Perfect Integration:** Transactions are going to be effortless for the users since the blockchain is perfectly implemented into our wallet module.

Conclusion: In conclusion, the company is committed to providing a reliable and efficient transaction experience to the users. By developing our own blockchain technology and merging it with our wallet module, we will be able to offer lightning-fast transaction speeds, reduced transaction fees, and increased safety. Users will be able to perform transactions quickly and securely, without worrying about fees or delays. Our blockchain-based marketplace will revolutionize the way our users conduct transactions and look forward to its launch.

DEVELOPMENT AND INTEGRATION OF A BROWSER EXTENSION FOR DIRECT ACCESS TO THE COIN7 MOBILE APP

Introduction: Our primary objective is to offer our users an effortless and hassle-free way to access Coin7. To achieve this, we have chosen to create a browser extension that lets users access the Coin7 Mobile App directly from their web browser. This whitepaper details our plans for the browser extension and explains our approach for perfectly integrating it with various popular web browsers.

Development of the Browser Extension: Coin7's Mobile App can be accessed directly from your web browser with our browser extension. A variety of tests will be done to verify that the extension perfectly works with popular web browsers like Google Chrome, Mozilla Firefox, Safari, and Microsoft Edge. Additionally, we will make sure that the extension is uncomplicated to utilize and user-friendly.

Integration of the Browser Extension: The integration of our browser extension will be seamless and easy. We will ensure that the extension is easy to install and use and that it works without complications in our users' web browsers. To ensure successful integration, we will work closely with the developers of various web browsers to ensure that the extension meets all necessary requirements.

Improving User Experience: After the successful launch of our browser extension, we will gradually expand its features to further improve the user experience. We will gather feedback from our users and implement new features and improvements based on this feedback. We will also ensure that the extension stays up-to-date by regularly updating it and ensuring that it is compatible with the latest versions of web browsers.

Conclusion: In summary, our browser extension will facilitate direct access to the Coin7 Mobile App from the web browser, maintaining a flawless experience for the users. The extension will be intuitive and simple to navigate. We plan to optimize the user experience by adding more features gradually, making it more convenient for users to access the Coin7 Mobile App at any time. We believe that our browser extension will transform how our users use the Coin7 Mobile App and are excited to introduce it.

DEVELOPING AND INTEGRATING A PAYMENT GATEWAY FOR SECURE CRYPTOCURRENCY TRANSACTIONS

Introduction: Our company aims to provide our users with a satisfying experience of buying products from external stores using our mobile app and browser extension. In order to accomplish this, we decided to create and include a payment gateway that permits users to perform transactions with cryptocurrency.

Developing the Payment Gateway: The payment gateway will enable users to easily transact using cryptocurrency. We plan to enhance the payment gateway in a way that preserves reliable functionality and protects against any potential threats. Furthermore, we intend to create a payment gateway that is easy to use and accessible for our customers while maintaining a high level of security.

Integrating the Payment Gateway: Our goal is to guarantee that the payment gateway operates without any interruptions or difficulties and is pleasant for users to navigate. With the aim to promote a successful integration process, we will closely collaborate with developers of major external organizations to verify that the payment gateway fulfills all essential criteria.

Working with Open APIs: We will also work with open APIs to enable other applications to work seamlessly with our payment gateway. This will allow our users to transact using cryptocurrency across different platforms and applications.

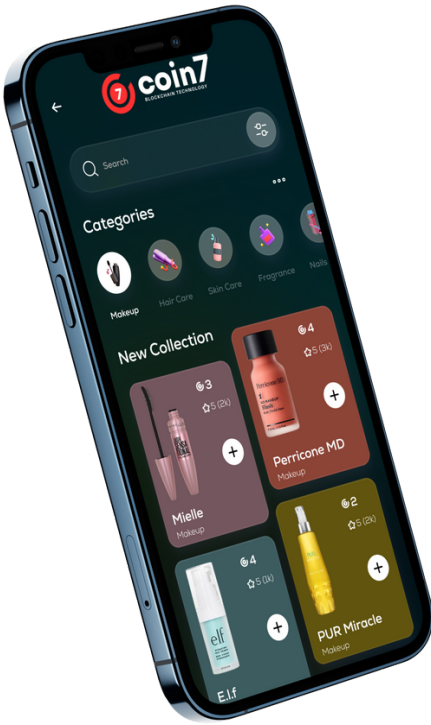

DEVELOPING AND INTEGRATING A PAYMENT GATEWAY FOR SECURE CRYPTOCURRENCY TRANSACTIONS

Expanding the Payment Gateway: After successfully launching the payment gateway, we will gradually expand its features to meet our users' needs. We will collect feedback from our users and use it to implement new features and improvements. We will also be certain that the payment gateway remains up-to-date by regularly advancing it and ensuring that it is compatible with the latest versions of external stores.

Conclusion: In summary, our payment gateway simplifies cryptocurrency transactions, providing our customers with a seamless and flexible payment experience. Our objective is to establish a payment gateway that operates flawlessly and is easy to use. By working with open APIs and gradually expanding its features, our payment gateway will meet the needs of our users and will remain a reliable and convenient way to transact using cryptocurrency. Our payment gateway will modernize the way our users conduct purchases with external stores and look forward to its launch.

MARKETPLACE FOR GOODS AND SERVICES

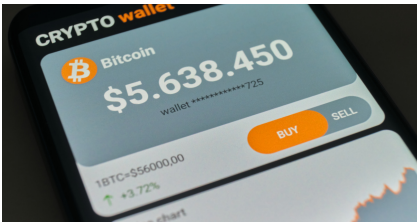

Introduction:

Our team has been tirelessly developing the world's first cryptocurrency-based marketplace for goods and services. We believe that this innovative platform will revolutionize the way people transact and pave the way for a new era of decentralized commerce.

MARKETPLACE FEATURES:

Introduction: Our team has been working tirelessly to create the world's first cryptocurrency-based marketplace for goods and services. We believe that this innovative platform will revolutionize the way people transact and pave the way for a new era of decentralized commerce.

Marketplace Features: The marketplace will enable users to buy and sell goods and services using our proprietary cryptocurrency. This will increase the circulation volume of our coin, and thus, increase its value. Transactions will be secure and efficient. Furthermore, we will employ a trust system to prevent fraudulent activity. Every purchase and sale will be processed through our escrow program, where funds will be held until the transaction is complete.

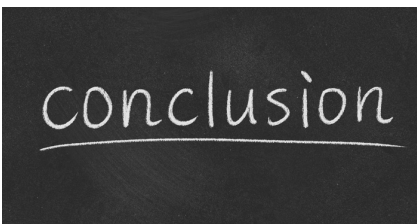

WALLET INTEGRATION:

Users can store various cryptocurrencies in our wallet. However, to buy or sell goods and services on our platform, they will be required to purchase our proprietary cryptocurrency through our app or directly at the marketplace's payment process. Users can buy our coins using credit cards or other cryptocurrencies.

COMMISSION AND MLM SYSTEM:

At the beginning, our commission fee will be 15%, and a portion of this fee will be distributed to our app users through our MLM system. This will encourage users to promote our app and marketplace, leading to increased transaction volume.

CONCLUSION:

We are excited to bring our marketplace to the world and bridge the gap between virtual and real-world goods and services. As part of our digital currency growth initiative, our network provides a secure and dependable platform for user transactions.

In order to meet the needs of our users, we will continue to innovate and improve our infrastructure.

COIN7 - A PROMISING INVESTMENT IN A STABLE AND INNOVATIVE ECOSYSTEM

Introduction: Coin7 is a new investor coin that will be created on the Ethereum blockchain. Our goal is to provide a sustainable and visionary investment opportunity for our users, while making sure that the token price reflects our company's value. We have designed our token to be released in a controlled manner, with focus on long-term growth and reliability.

Presale: During our presale mode, only 10% of the tokens will be offered at a price of \$0.01 per token. This limited offering is designed to protect our investors and ensure that the token price reflects the true value of our company. An additional 10% of the coins will be available after listing on an exchange.

Limited Release: To support a stable value development of the Coin7 token, we will only release additional coins into circulation once we have reached 1 million users. For each subsequent million users, 1% of the total coin amount will be released. However, the maximum amount of coins available for such an increase is limited to 50% of the total amount of coins. By limiting the release of coins, we aim to maintain Coin7's value and protect the interests of our investors.

No Further Coins: We will not release the remaining coins into circulation for the next 2 years, but we are going to use them for investments or partnerships. This decision is based on our commitment to the overall success and growth of Coin7. In order to preserve Coin7 price stability, we will not sell our coins below the presale price. Through these measures, Coin7 targets to strengthen the investors trust and achieve consistent and sustainable value growth.

Conclusion: The Coin7 token represents a promising investment for all investors who wish to benefit from our company's innovative technology and growth potential. By releasing our tokens in a controlled and limited manner, we intend to provide stability and value growth for our investors. Our approach to token release, combined with our advanced ecosystem and commitment to long-term growth and stability, will make Coin7 a successful investment.

INVESTMENT STRATEGY FOR COIN7 TOKEN PRESALE PROCEEDS

Introduction: Coin7 is an innovative blockchain-based platform that aims to revolutionize the way people invest in digital assets. Our plan is to allocate a substantial portion of the capital generated from the presale towards the project, to fund the platform's growth.

Investment Strategy: We believe that investing the majority of the presale earnings back into the project is the most effective way to ensure its success. Therefore, we plan to allocate 80% of the funds raised to the following areas:

- **Expansion of the Development Team:** To certify that we meet our development timelines, we plan to add ten additional blockchain programmers to our existing team. This will help us advance the framework and assure that our users get the best possible product.
- **Server Infrastructure:** We plan to upgrade our server infrastructure to enhance the platform's performance, reliability, and security. This will enable us to provide a seamless and appealing user experience for our customers.
- **Company Structure:** Our intention is to transform our company from a Limited to an AG and create various branches in different countries. By doing so, we intend to broaden our worldwide presence and strengthen our reputation within the industry.
- **Exchange Listing:** We plan to list our token on several major exchanges to increase liquidity and improve marketability. This will allow more investors to participate in our project and benefit from its potential growth.
- **Marketing Activities:** In our view, marketing plays a major role in our achievements. As such, a substantial portion of our presale revenue will be allocated towards marketing activities. Our primary focus will be on attracting one million app users as quickly as possible, using the following strategies:

Social Media Marketing: Our company will establish a strong presence on various social media channels, including Facebook, Twitter, Instagram, and LinkedIn. We will regularly post updates and engage with our target audience to create brand awareness and attract new users.

Influencer Marketing: We will collaborate with influencers who have large and engaged followings and leverage their communities to promote our app.

App Store Optimization: It is the company's objective to optimize the app for relevant keywords in order to increase its visibility and ranking within the app store.

Paid Advertising: Paid advertising on different platforms, including Google Ads, is one of the planned strategies to enhance user acquisition and boost traffic towards our app.

TOKENOMICS

INVESTMENT STRATEGY FOR COIN7 TOKEN

PRESALE PROCEEDS

Content Marketing: Creating regular blog posts, videos, and other content is the approach we take to share information and engage our target audience to participate and generate traffic to the app.

Email Marketing: To inform our users about upcoming features and updates, we will build an email list and send regular newsletters.

Events and Webinars: Our app will be presented occasionally at both virtual and physical events, to reach our target audience and demonstrate how our app can benefit them.

Partnerships: We will partner with organizations and companies that have similar target audiences to promote and market our app.

App Feedback: Users' suggestions and concerns will be taken into account in order to continuously improve our app and meet the needs of our audience.

Conclusion: Our confidence in the investment strategy lies in its potential to not only achieve our objectives but also to establish Coin7 as a prominent figure in the digital asset investment sector. We are committed to using the presale funds wisely and delivering a superior product and experience to our users.

The Coin7 team consists of experts in software development, marketing, and business management, as well as five external blockchain programmers, all actively involved in the development and implementation of our project.

We are a Liechtenstein-based company and highly value transparency and communication. We believe that our success is closely tied to the trust our investors and users have in us. Therefore, we regularly update on our project progress and communicate all important and significant steps, successes, and challenges openly on our website and through our social media channels.

Our team works hard to make the most of Coin7 and create a reliable, innovative, and user-friendly network that provides real value to our users. The opinions and suggestions of our investors and users are greatly appreciated, and we take them into consideration in all of our decisions.

We take great pride in our collective achievements with Coin7 and eagerly anticipate enhancing and advancing the platform, confident that we will attain exceptional accomplishments. We take great pride in our collective achievements with Coin7 and eagerly anticipate advancing the platform, confident that we will attain exceptional accomplishments.

MINING TOKEN - REVOLUTIONIZING THE WAY WE MINE AND TRADE"

Mining Token: We are excited to introduce our upcoming mining token. However, we are not disclosing the name of the token until it receives global protection. Initially, our mining function will run in simulation mode until we launch our own blockchain.

As soon as the testing phase is completed, the "Mining Token" generated in simulation mode will be sent to the user's wallet as real coins, marking the end of the simulation mode and initiating the transition to real mining. We will only provide a certain amount of coins for mining each day, which will be distributed among app users who have chosen to mine. As the number of app users and daily limits increase, the amount each user can earn through mining will decrease. With the increasing number of app users, the value of our company and therefore the value of our "Mining Token" will also increase.

We will periodically provide a certain amount of tokens for mining each year. Based on the needs and development of the financial market, the yearly release of tokens for mining will be adjusted. To maintain the stability of our mining token as a cryptocurrency, we will collaborate with our investors and miners in deciding the optimal amount of tokens to distribute. A separate escrow account will be created to invest 20% of our advertising revenue. The funds in this account will be utilized to invest in other assets such as real estate and precious metals, making our mining token one of the first coins on the market backed by real assets at the time of exchange listing. All of this information will be available on our website.

The percentage breakdown of how the mined coins will be distributed to the various involved parties:

- Company: 40% of total mined coins
- Miners: 40% of total mined coins
- Upper levels in MLM system: 20% of total mined coins

The exchange listing will only take place once a certain amount of coins is available, estimated to be at the end of 2024.

We value the input of our investors and miners, and we will incorporate their feedback into our plans to ensure that our mining token remains stable and successful.

ABOUT TEAM WORK

The Coin7 team consists of experts in software development, marketing, and business management, as well as five external blockchain programmers, all actively involved in the development and implementation of our project.

We are a Liechtenstein-based company and highly value transparency and communication. We believe that our success is closely tied to the trust our investors and users have in us. Therefore, we regularly update on our project progress and communicate all important and significant steps, successes, and challenges openly on our website and through our social media channels.

To fully realize Coin7's potential, we plan to restructure our company into a stock corporation (AG) or establish a new company under the name Coin7. This measure aims to better position our company and increase our growth potential.

Our team works hard to make the most of Coin7 and create a reliable, innovative, and user-friendly network that provides real value to our users. The opinions and suggestions of our investors and users are greatly appreciated, and we take them into consideration in all of our decisions.

We take great pride in our collective achievements with Coin7 and eagerly anticipate enhancing and advancing the platform, confident that we will attain exceptional accomplishments.

Roadmap

2022

Q1-Q2 2023

Q3-Q4 2023

Q1-Q2 2024

Planning and
conception of the
app

Mining Module

Advertising Module

MLM Module

Public Release

Wallet Integration

Browser Extension

Blockchain Programming

Marketplace Module

Payment Gateway

Roadmap

Planning and conception of the app

Mining Module

Implement the mining module for users to mine cryptocurrency with their mobile devices. Ensure the mining operations run well by in-depth inspection and maintenance. The mining module will be released for beta testing to a select group of users in order to gather feedback.

Advertising Module

The app will contain an advertising module that allows businesses to advertise within it. Evaluate the performance of the application and optimize the overall user experience. Launch the advertising module, initially focusing on a few select advertisers and gradually expanding to a wider audience. Users who have enabled the feature will be rewarded with our coin.

MLM Module

Embed the Multi-Level Marketing (MLM) module to create a powerful network marketing platform. MLM operations receive comprehensive inspections and refinements to establish a consistent and effective system. The MLM module rewards users for inviting others to the app. Publish the MLM module and gradually expand to a larger audience.

Public Release

Final testing and optimization will be conducted to verify that all modules work seamlessly together. Promote the app through a strong marketing campaign on the App- and Play Store to attract users. Utilize popular crypto portals and influencers to attract potential customers or investors to our project. Social media is used to increase visibility and awareness of our project.

Wallet Integration

Build a wallet module that stores and manages cryptocurrency. Perform analyses and improvements on wallet operations to guarantee their proper functionality. Launch the wallet module and gradually expand its features to meet user needs.

Browser Extension

Develop a browser extension to allow users to access the app directly from their web browser. The extension will be reviewed precisely and enhanced for smooth functioning with popular web browsers. Release the browser extension and gradually expand its features to improve the user experience.

Payment Gateway

Create a new payment gateway to allow users to easily transact using cryptocurrency. Conduct in-depth evaluation and refinements to boost transaction privacy and efficiency without any potential risks. Publish the payment gateway and gradually expand its features to meet user needs.

Blockchain Programming

Incorporate blockchain technology into the app to maintain a secure and transparent transaction process.

Achieve optimal blockchain operations by implementing updates that guarantee an improved and refined system. Release the blockchain module and gradually expand its features to provide greater value to users.

Marketplace Module

Build a marketplace module that allows users to buy and sell goods and services with cryptocurrency. Introducing the marketplace module and gradually increasing its functionality. Find products and suppliers that are high-quality, unique, and offer them for sale. Work together with qualified companies and freelancers which provide a variety of goods and services.

Roadmap

Pre-Sale Exchange Listing Coin7

Planning and Preparation : Q1-Q2 2023

Defining business goals and creating a whitepaper

- Selecting the appropriate blockchain platform and smart contract development
- Assembling an experienced team and preparing the marketing plan

Pre-Sale Q3-Q4 2023

Launching the presale and running marketing campaigns to increase interest

- Establishing partnerships and connection in the cryptocurrency industry
- Using the presale funds to finance development and marketing efforts

Initial Coin Offering Q3-Q4 2023

Conducting the ICO and selling tokens to investors

- Continuing marketing activities and advertising on relevant crypto platforms
- Ensuring compliance with legal regulations and transparency towards investors

Exchange Listing Q1-Q2 2024

Registering and submitting to various exchanges to achieve coin listing

- Negotiating with different exchanges and finalizing agreements for listing
- Publishing the coin7 on several exchanges and beginning trading

Advanced Activities Q3-Q4 2024

Implementing more features and expanding marketing efforts

- Enhancing the security and including more features
- Expanding marketing activities and growing the user base

Investing in the Coin7 token entails inherent risks that should be carefully considered by prospective holders before making a purchase. The purchase of Coin7 tokens carries the potential risk of losing some or all of the invested capital.

Prior to investing in Coin7 tokens, prospective holders should carefully assess the risks outlined in this whitepaper, as well as any other unanticipated risks that may arise in the future.

The regulatory status of cryptocurrency and tokens may vary across jurisdictions, and there is a possibility that laws, regulations, or policies may be implemented in the future that could affect the acquisition, usage, sale, or conversion of Coin7 tokens. It is recommended that prospective holders fully understand the tokenomics and ecosystem of Coin7 before making any investment decisions.

Cryptocurrency and tokens can also be subject to theft or expropriation. If the Ethereum Chain on which Coin7 tokens are built is successfully attacked by malicious actors, there may be no remedy for the loss of tokens. The platform may also be vulnerable to direct attacks, such as malware or distributed denial of service attacks, which could result in the loss of tokens or access to them.

It is advised that prospective holders seek professional advice from independent financial advisors, tax consultants, accountants, or lawyers to address any concerns related to the purchase of Coin7 tokens.

In summary, purchasing Coin7 tokens involves risks that should be fully understood before making any investment decisions. While we aim to minimize risks to the best of our ability, prospective holders should take into account all potential risks and consult with professionals to make informed investment decisions.

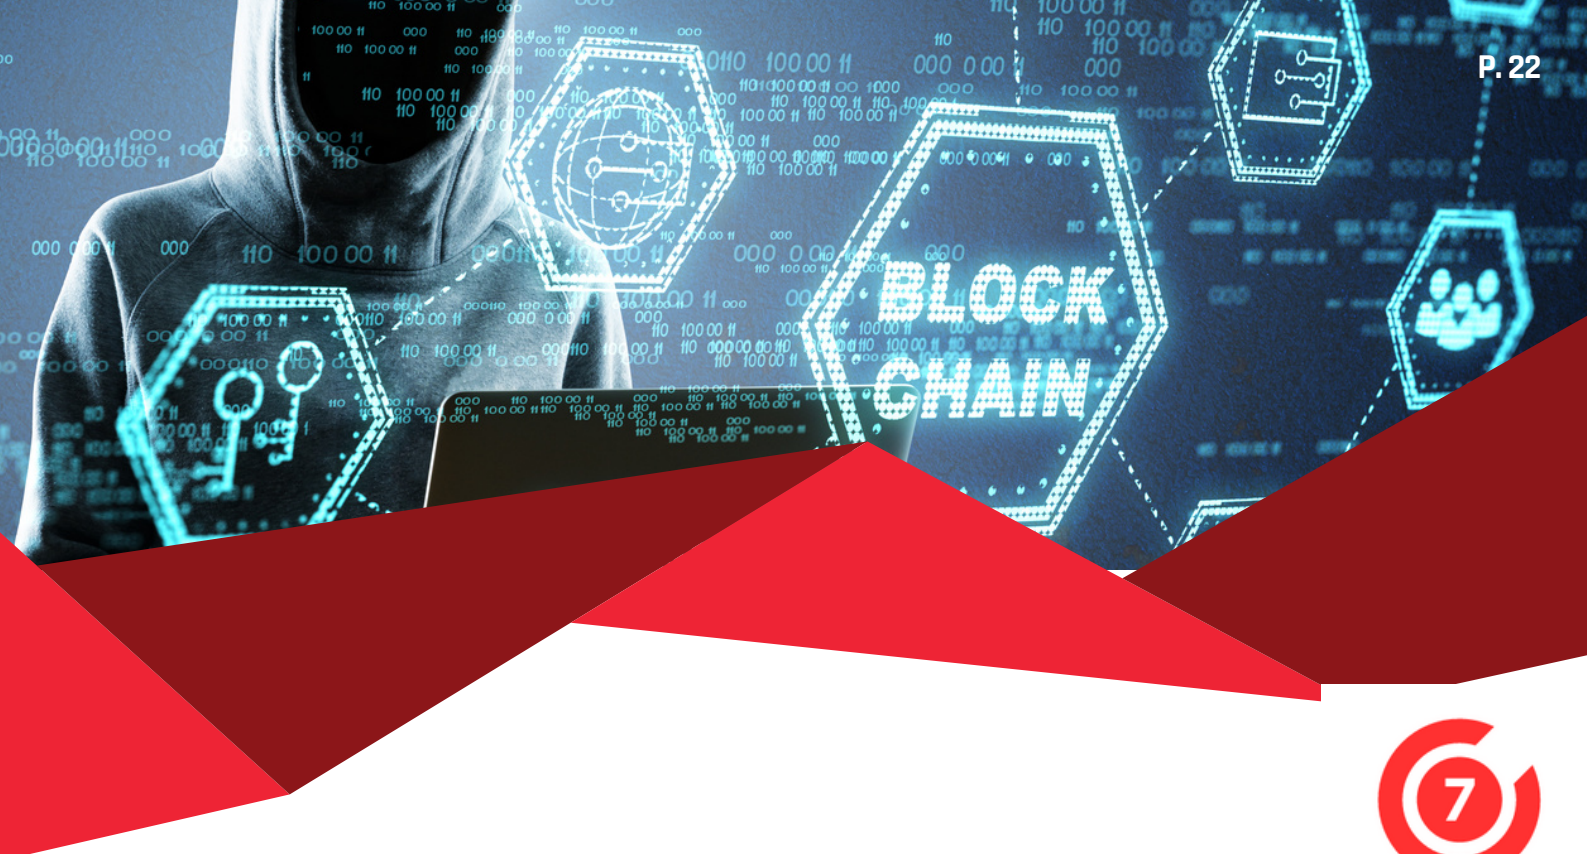

Coin7 is an innovative blockchain platform that allows users to invest and trade in cryptocurrencies easily and securely. Our team consists of experts in blockchain technology, software development, marketing, and business management.

Our goal is to create a reliable, innovative, and user-friendly platform that provides real value to our users. Our platform will enable users to buy and trade cryptocurrencies easily and securely, as well as trade on our own dedicated marketplace.

Our Coin7 token is an ERC-20 token that runs on the Ethereum blockchain. By purchasing Coin7 tokens, users can invest in an innovative project with high potential. We are aware that investing in cryptocurrencies carries some risk, and therefore we have created a comprehensive risk statement that highlights potential risks for our investors.

We place great importance on transparency and open communication, regularly informing about the progress of our project and communicating all important steps, successes, and challenges openly on our website and social media channels.

We are proud of our team and our shared success. We are confident that we will achieve great things together and look forward to continuing to develop and improve Coin7.

Coin7 is an innovative blockchain platform that allows users to invest and trade cryptocurrencies easily and securely. Our team consists of experts in blockchain technology, software development, marketing, and business management.

For the purpose of creating a reliable, advanced, and user-friendly network, our platform will allow users to conveniently buy and trade cryptocurrencies, while also enabling them to trade on our own dedicated marketplace. The Coin7 token is based on ERC-20 and runs on the Ethereum blockchain. With this token, users have the opportunity to invest in an innovative project with great potential.

We are aware that investing in cryptocurrencies carries some risk, and therefore we have created a comprehensive risk statement that highlights potential risks for our investors. Our company emphasizes transparency and open communication by regularly keeping investors and users informed about our progress and communicating all important steps, successes, and challenges openly.

We hope that we have provided a clear and comprehensive overview of our project. However, if you have any further questions, please do not hesitate to contact us at info@coin7.org.
